

Up All Night

And with the light of her smile
She kept me up all night

I was aimless 'round town and down with a frown
When love whirls by and stumbles me around
A smile visits with her, she winks and says "hey"
Her smile ignites my mind when I rest 'n lay

She kept me up all night

Beyond words and beyond compare
The best hint is her perfect stare
She gave a smile that was closer than touch
I couldn't get to sleep in the wave of that rush

She kept me up all night

Ok, so I'm a little slow at play
When we happened by each others way
I was ruttet in thought, then her smile tripped the trap
And that smile left me sleepless in the aftermath

She kept me up all night
